Information

The tap is easy to setup and does and can be used with several different packet sniffing software such as Wireshark and NetworkMiner.

Just setup as the picture below and the product will work.

Why use this product?

Want to see what people on your network our doing.

If so the Passive Network Tap can help you see what people on your network our doing and looking at, and if you are a parent who wants to keep their child safe on the internet this tap can help you find out what sites they are visiting.
