LearnBox

An Evolving Platform For Raspberry Pi

Machines using the Raspberry Pi are becoming more and more prevalent in the marketplace. Employees with technical skills are highly valued, and current curriculum has difficulty keeping up.

With the LearnBox, keep ahead of the curve by learning yourself.

Learn several computer languages in an environment of your choice.

Parts List

- TFT AV Car Backup Monitor
- Raspberry Pi
- 5V Rechargeable Battery
- 12V Rechargeable Battery
- Small Keyboard
- Optical Mouse
- Wooden or Acrylic Case
- Connecting cords and adapters

That’s it!

Start Here

With the LearnBox you can choose your own curriculum.

Want to go pro? Build it yourself.

While several options are available for ordering, our designs are all open source online. Get some tools together and build it yourself!

Out of ideas? Check out the forums.

The inspiration for this project was my own desire to learn. Having little budget and little space, I wanted to learn how to script and build my own scripting tools. I wanted to experiment with penetration testing and train myself in the use of tools for that purpose. Finally, I wanted a platform that I could adapt and evolve over time.

My needs are not necessarily your needs. Contact me via email at any time and I will help to see how well I can deliver on your own personal learning needs.

There are a host of helpful forums out there with intelligent people doing incredible things with the Raspberry Pi.

If you want to hone your skills or just need the answer to a specific question, forums offer a great way to find the answers. For more information, feel free to contact me and I can give you an overview on the resources at your disposal.

With a changing market and a changing world, the workforce of tomorrow needs to be able to change with it.

“Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a lifetime.”
